

## QUALITY, OCCUPATIONAL HEALTH, INDUSTRIAL SAFETY AND ENVIRONMENTAL POLICY

PRODATA ENERGY C.A. is a services company for the oil and gas sector, committed to excellence in the areas of Quality, Occupational Health, Industrial Safety and Environment. It focuses on providing services that ensure customer satisfaction, business profitability and the welfare of stakeholders, as well as the ongoing improvement of the integrated quality management system, compliance with legal requirements and other standards the company adheres to, related to environmental aspects and the prevention of accidents and occupational diseases. PRODATA ENERGY secures the necessary resources to establish itself as one of the leading companies in the hydrocarbon sector.

To achieve its objectives, the company undertakes to:

1. Establish and monitor the objectives and goals for the fulfillment of the integrated management system for Quality, Occupational Health, Industrial Safety and Environment in the workplace.
2. Conduct audits, inspections and promote preventive observation among all personnel, in order to detect unsafe acts, hazardous conditions and deviations from established standards and procedures, prevent incidents, occupational diseases and damage to the environment. It is the company's duty to investigate, notify and disclose any undesirable event and implement corrective actions to avoid its recurrence.
3. Recruit motivated personnel with a high degree of responsibility and commitment towards the performance of their activities, providing them with the necessary competence in training and development both in their occupation and in Occupational Health, Industrial Safety and Environment, for their best performance at work while maintaining a preventive attitude.
4. Guarantee optimal working conditions through the implementation and dissemination of the integral program of quality, occupational health, industrial safety and environment, to allow control of the risks inherent to their activities.
5. Comply with legal requirements and other regulations that the company endorses for the prevention of environmental pollution, occupational diseases and accidents.
6. Ensure that employees and their representatives actively participate in achieving an appropriate and harmonious work environment in which they may maximize their physical and psychological capabilities.
7. Promote job satisfaction by implementing measures, plans and motivational programs to maintain a good working environment.
8. Preserve the environment through the effective use of natural resources and energy; prevent environmental pollution at its source by reducing, reusing, recycling and properly disposing of waste and effluents generated by the company.

PRODATA ENERGY bases its integral management system under the scope of the requirements of the international standards ISO 9001: Quality Management System, ISO 14001: Environmental Management System, OHSAS 18001: Occupational Health and Safety Management System.

In this respect, the company complies with the corporate values aligned with Excellence, Client Commitment and Sustainable Development, generating added value through the professionalism of our collaborators, the implementation of state-of-the-art technologies in operations and the efficient use of resources.

  
Roberto Villalba
